

# CLEANING LIGHT BEAM

LASER CLEANER FOR ANILOX ROLLERS AND SLEEVES

In cooperation with:

We are glad to introduce our new off-line anilox laser cleaner.

The power of laser beam removes all types of dirt, such as inks and coatings.

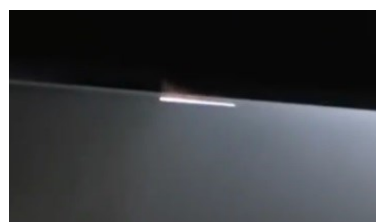

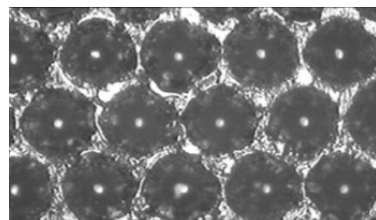

The system can be used for all types of engraving.

The deep clean given by the laser beam restores the original volume of the ceramic cells, bringing the anilox to the best conditions.

Laser cleaning is the most sustainable cleaning technology method, since it doesn't require any water, chemicals or granulates.

## Advantages:

- Deep clean: it removes any kind of dirt
- Restores cell volume of anilox rollers/sleeves
- Highest printing quality
- In case of anilox rolls, no need to remove gears or bearings
- Easy operator interface
- Preset cleaning cycles
- No water, chemicals or granulates
- Most sustainable cleaning method
